DETAILED ACTION

Information Disclosure Statement

The examiner notes for the record that the European Search report, lined-through on the previously submitted IDS, has been considered. It is listed on the attached PTO form 892.

103 Rejections Withdrawn

The rejection of claims 1-7 under 35 USC 103(a), outlined in the previous Office Action, has been overcome by applicant's amendment and arguments. The amendment cancels claim 3. With respect to the remaining claims, applicant's amendment and arguments have been carefully considered and are persuasive, vide *infra*.

Allowable Subject Matter

Claims 1, 2 and 4-11 are allowed. The following is an examiner's statement of reasons for allowance:

The key to the instant invention is the control of the concentration of both a benzamide compound and a benzoic acid compound in the hydrogenation reaction, such that these concentrations remain below certain specified concentrations.

JP 38-8719, discussed by applicant in the specification, is considered to be a representative example of the state of the prior art. Applicant's discovery (that the

control of the concentration of both a benzamide compound and a benzoic acid compound in the hydrogenation reaction greatly influences yield and catalyst life) is evidenced by the comparative examples and constitutes an unexpected result. Case law would also seem to support a conclusion of nonobviousness: The discovery of a problem is evidence of unobviousness, even though the solution may be obvious once the cause of the problem is known. *Eibel Process Co. v. Minnesota & Ontario Paper Co.*, 261, US 45, 43 S. Ct. 322, 67 L. Ed. 523 (1923).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
